**Attachments:** Council Discussion Topics.pdf; HAMP Alignment 3.5.14.pdf

All:

Attached are the two handouts used in yesterday's Hopi Tribal Council meeting. The overall response from the Council was very positive. Our message emphasized the need for the Tribal Council to finalize the Village/Tribal and Village/HPUA agreements and to select an HPUA director as soon as possible. The Council also understood the importance of pursuing grid power through APS, and my understanding was that the Council endorsed our actions to pursue the power line extension. Lionel mentioned that the Chairman would sign the quote request letter, and that it would be forwarded to APS most likely this week. The Council also understood the importance of pursuing the USDA application for the Villages now, and that a second application to the USDA could be made in the future, after fully exploring the pros and cons of bringing the BIA into the project, and I indicated that we would pursue that course of action in finalizing the PER now for the Villages only.

I believe John Hamilton was taking notes during the meeting, and if possible, we'll copy the team on his full notes, when available.

Thanks to everyone for your contributions towards the project.

Adam
